## What to Expect

Greetings, parents/guardians! The purpose of this letter is simply to inform you of the reality of the program. The sessions will be physically challenging for your child. As part of this program, we will use a variety of DMI exercises. In order to ensure their tolerance and endurance, we will tailor the schedule to meet their needs. It's important to know that the intensive session can be physically and emotionally exhausting. It is all worth it when they achieve success throughout the program.

The home exercise program will be an important part of this program. We will coordinate with you on scheduling to ensure proper alignment before closing out each session. As part of the program, you will be provided with information & exercises specific to your child's development. These tasks will be pertinent to your child's continued progress after the intensive program. Please let us know if there are any exercises that you do not feel confident continuing at home; we will work together to find a solution that works for all parties.
